Only five cars completed the 11,000-mile World Cup Rally- four were using Esso Uniflo

Fifty-four cars started. Only five lasted the complete course which covered thirteen countries and crossed the Sahara twice.

It was probably the most gruelling rally ever devised and was a real test of endurance for the drivers, the vehicles, and the oil.

Esso congratulates the drivers of the three Peugeots, and the Jeep, prepared by Esso dealer David Howes, on their skill, perseverance, and their choice of motor oil - Esso Uniflo.

Immense hot-engine strength
Uniflo is an unusually highly-refined oil. Its extra pure texture, plus its own unique Viscosity Index improver, ensures faultless protection.

Better cold-protection too
Being an SAE 10W/50 oil, Uniflo circulates much faster from start-up than any 20W/50. It helps the engine to turn over and spark, avoids a great deal of cold-engine wear and conserves your battery.

You're in good company with
